

# Money Mangement

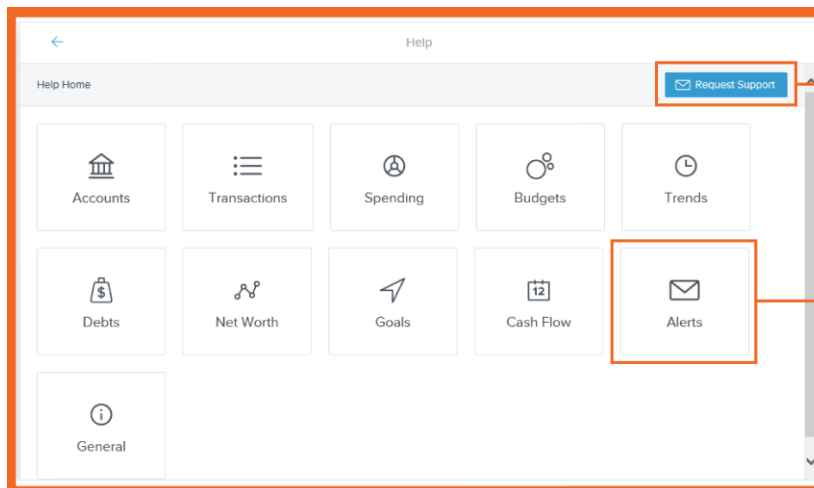

## Help Guide

Money Management has a much better support system than FinanceWorks. Each tab on the menu bar has its own individual help page, plus you can contact a Money Management specialist directly for assistance. Below is an image directing you to the help features if you need to access them.

The Money Management Help Feature is Located Here

Once you click the Help link shown above you will be directed to a screen that offers help for each individual program, as well as a link to email Money Management directly.

This link allows you to send an email request directly to the Money Management support team.

Each of these tabs offers additional help that may allow you to quickly find answers to your questions.

The Money Management support staff will be available Monday through Friday from 7:00 am until 7:00 pm, and they respond to all inquiries within one business day. Some issues may be resolved immediately, and others may take more time. The Money Management support team will maintain regular communication with you until any issues are resolved. If you submit a help request, you will immediately notice an auto response email. You will want to watch for any emails from **support@moneydesktop.zendesk.com** with a subject line of **“Guru (Software Support)”** or **“Software Support.”**

Money Management is an award winning budgeting platform that offers dynamic new features to our members, and we are excited to offer this new system to our members. If you would like to take a closer look at Money Management, [click here for a complete overview](#).
